

Robin Enterprises Co.

The Green Printing Process

Robin Enterprises Co. is continuing a proactive approach towards environmentally friendly printing with our introduction of our [Green Printing Process](#). We have teamed up with many distributors in the industry to produce an environmentally responsible printing process. With the continued support of our customers, suppliers and staff we feel that we can make a difference. The [Green Printing Process](#) consists of many products combined into one printing procedure. These products combined into one printing process can give our customers confidence and trust in the types of products they are distributing. Together we can all make a difference and no one believes this more than the staff at Robin Enterprises Co. If you would like additional information please contact one of our sales associates or visit us on the web at www.robinenterprises.com. Here at Robin Enterprises Co. we take the environment serious. In addition to the Green Printing Process mentioned, we currently have many different types of programs [in place.](#)

1. We currently recycle our press wash solvents on site. This has reduced the amount of products sent out as hazardous waste. Example, since 2002 we have reduced our hazardous waste by 95%. This was such a drastic change that we were highlighted in the EPA news letter. If you would like to see this article you can view it on the front page of our website.
2. The water that is removed from the solvent recycling is clean and reused within our facility reducing the amount of water and energy consumption.
3. We currently filter and reuse the heat generated from the presses to heat other parts of our facility.
4. All paper waste generated is sent out for recycling.
5. All printing plates are sent out for recycling.
6. Aqueous and solvent drums are sent back to the suppliers for reuse as opposed to being put into the landfills.
7. Our facility lighting is all green-tip and recycled.

If you would like a tour of our facility to learn more about the current and future plans or require additional information please contact one of our sales associates or click on the following link. [Request for Additional Information.](#)
